PUBLIC
SCHOOL
BOARD

1924

ANNUAL REPORT
of the
TRUSTEES OF THE SCHOOL DISTRICT
OF WINNIPEG, No. 1

FOR THE YEAR ENDED
31st DECEMBER

1924

GOOD SCHOOLS DO PAY

The money which we put into education is an investment in the country's greatest asset. There are those who will send their money a thousand miles to promote a gold mine which they have never seen. There is precious metal close at hand which will pay better dividends. It cannot depreciate; it cannot fail. It is limited only by the conditions which we, its trustees, place upon it. If we fail to develop it, then we shall be untrue to our trust. We shall have allowed a great national resource to languish.—N. E. A. Research Bulletin.

SPECIAL COMMITTEES

SITES COMMITTEE—A. Congdon (Chairman), A. H. S. Murray, A. E. Bowles, R. R. Knox, E. McGrath.

GROUNDS COMMITTEE—A. H. S. Murray (Chairman), W. A. Matheson, R. Durward, M. Hyman, L. J. Elliott.

REPRESENTATIVES ON TEACHERS' RETIREMENT FUND BOARD—F. S. Harstone, W. A. Matheson, H. A. McFarlen, M.D.

These Committees meet at call of Chairman

The Chairman of the Board is an ex-officio member
of all Committees

Wolseley School Grounds—Front View

The following reference to these grounds appeared in the local press last summer:

"Magnificent beds of old fashioned flowers chosen with an eye to the blinding colors and the wealth of bloom, patterns the emerald lawns and the school itself both the windows and the Wolseley School. A dozen varieties and a hundred hues combine there and the rusty red of the one-storey school serves as a colorful background."

A creek formerly ran through what is now known as the Wolseley School Grounds, the banks of which were the dump heap for the neighborhood. With the erection of the School and the beautifying of the grounds under the Improvement of Grounds Committee, a wonderful change has been made, as is partially illustrated above.

ANNUAL REPORT OF THE CHAIRMAN

Winnipeg, December 29th, 1924.

To the Members of the
Winnipeg School Board.

Gentlemen:—

In accordance with the practice of recent years that the Chairman shall give, at the final meeting of the Board, a summary of the work of the schools, I beg to submit for your consideration a brief outline of the operations of the public schools for the year ending December 31st, 1924.

Detailed information regarding enrolment, attendance, withdrawal and promotion of pupils, together with figures relating to the activities of the various auxiliary services, will be found in the attached statistical report. It is not necessary here to make detailed reference to all these statistics, but some items call for special interpretation or emphasis.

The average monthly enrolment of pupils for the year 1924 was 36,255. This is an increase of 492 over the average enrolment 35,763 reported for 1923. The month of largest enrolment was October, during which 36,660 pupils were present. It is significant that the rate per cent. of increase in enrolment in the senior grades of the elementary schools and in the high schools is nearly three times as great as the corresponding rate per cent. increase in grades one to six. A comparison of the enrolment for 1924 with that for 1914 shows that while in 1914 only 16 per cent. of the pupils enrolled were in grades higher than six, in 1924 24 per cent. were in these higher grades. Several causes have contributed to this tendency for a larger proportion of students to carry their education beyond the purely elementary stage. The organization of grades 7 and 8 of the elementary school, along with grade 9 of the secondary department into a Junior High or Intermediate School, has had a tendency to make grade 9 the objective for a large number of students who formerly looked forward to leaving

school at the end of grade 8. The difficulty of obtaining employment during the recent restricted years has also had an influence in inducing a larger number of students to continue in school. The chief factor, however, is believed to be the increasing belief on the part of parents that less than a high school course is not adequate preparation for entry upon the occupations and duties of life. From the point of view not only of parents but of the community at large, this lengthening of the period of education should be looked on with profound satisfaction. To keep the young people of the community under the influence of the school during the critical earlier years of adolescence is to ensure that habits and ideals shall be largely determined by the formative agency of education rather than by the accidental influences of the street or the workshop. No service that a school system can render can compare, in its value to the individual himself or to the community of which he is a part, with that of establishing right ideals and just principles of conduct, and the high school period is the stage of development at which example and association count for most in determining character. It is also the period when the range of his interests is enlarged, his intelligence extended and his mental powers capable of a degree of discipline and training not possible to the immature mind of the child in the elementary school. If opportunity for study were not open at this period, much of the value of their elementary training would be lost to boys and girls in cities and towns in the idle years between the end of school life and entry upon regular occupation. These considerations establish the necessity of the secondary school for all who are willing to take advantage of the opportunity it offers.

The attendance of pupils, as shown in the reports from year to year, has been consistently regular, the attendance for the year just closing having reached the high mark of 92 per cent. An analysis of the attendance by grades shows that it is only in the case of the primary grades, and in these only during the severe winter months, that the attendance falls below this standard. Attention has been called in previous reports to the importance of regular attendance in its bearing upon the progress of pupils. In the tables

appended to this report showing promotions and attendance for the year ending June 30th, 1924, the correspondence between the number of pupils promoted during the year, 29,559, and the number attending 150 days or more, 30,302, is remarkably close.

Several factors combine to secure the high percentage of regularity. The largest perhaps is the appreciation on the part of the parents of the relation of attendance to progress and the cordial support given by them to the school. There is also an atmosphere of kindness and sympathy in the classroom and a constant appeal to interest as a motive to effort which makes the school attractive to children. Vigilance on the part of the Medical Inspection Department in co-operation with the City Health Department, serves to lessen the amount of absence due to illness which is always one of the chief causes of irregular attendance. In this way the medical service, by keeping at a minimum the retardation of pupils through time lost on account of illness, makes directly an important contribution to education while at the same time promoting the physical well-being of the children of the community. The active co-operation of the Attendance Department serves to keep regularly in school those children who, through their own waywardness or on account of the indifference of parents, would otherwise absent themselves. This service is very effectively and tactfully performed.

The total number of promotions made during the year ending June 30th, 1924, was 29,559. Of these, 28,962 were advanced one grade and 597 two grades. 1,772 pupils completed grade 8 of the elementary school course and passed the examinations for entrance to high school. 586 were successful in the Departmental Examinations for entrance to the University or admission to the Normal School course for a 2nd class teacher's certificate, and 93 pupils passed the Departmental Examination for admission to the Normal School course leading to a 1st class teacher's certificate.

There has been no attempt at extension of the scope of the schools during recent years. The policy of the Board has been to maintain and develop with the

agencies at hand whatever is found worthy in the schools as they now exist and to make these schools render the best service of which they are capable. With this purpose in view, principals and teachers in all the larger schools have co-operated in an effort to facilitate the progress of students by classifying their students according to ability. The progress of pupils is ascertained by tests given from time to time throughout the year in the various schools and supplemented by tests issued to all schools in the city from the Department of Superintendence. During the last three years, special attention has been paid to this work of testing in grade 6, from which pupils enter upon the course of the Intermediate Schools, grade 9, the leaving grade of the Intermediate Schools and grade 8 the final grade of the Elementary Schools in districts where the Intermediate Schools have not yet been established. Tests have been given in December, March and June and the results obtained analyzed in the office of the Superintendent and returned to principals for their information. An attempt has been made to prepare tests which will as accurately as possible diagnose the difficulties of pupils, and therefore be suggestive of remedial measures to be taken by teachers in subsequent work. Analyses made of the results reported from the various schools have indicated also, subjects and classes where assistance from the Principal, Supervisors or Superintendent is most needed, thus economizing the time of Supervisors and Principals and making supervision more effective.

It is well known to all familiar with school work from the inside that students assembled in a grade by the ordinary examination tests consist of three distinct groups, the very bright students to whom learning comes easily, the average student, and the slower group, consisting of those to whom learning comes only through laborious effort. When these three groups are placed together in the same class, the temptation is to graduate the work to the requirement of the average group. In this way the rate of progress of the brighter student is retarded while many of the slower group, because their needs in the way of adaptation and explanation cannot be met, fall behind, become discouraged and are listed among the failures.

The experiments so far made are said to indicate that many students of the first group can complete the entire course from entrance to the Intermediate School to matriculation in four years, the second group requires the normal period but improves its general standing, while a larger proportion of the third group succeeds in completing the course in the normal period. At the present time there are enrolled in grade 11 in the High Schools some 70 pupils who entered grade 7 three and a half years ago and who, it is expected, will complete their course with distinction in June, 1925. These modifications in both procedure and organization in the interest of efficiency and economy, have been carried out through co-operation among teachers and principals of the several schools, each contributing his individual experience for the benefit of all.

In discussing organization and method, attention is specially directed to that side of education which is measured by progress in knowledge and mental ability, things that can be estimated and measured. But education has to do not only with the practical things that underlie performance of the daily duty, it has to do with life itself and the things that make for sane and happy living. On this account vocal music, art and literature are found in the schools as cultural subjects that develop interests and aptitudes tending to purify and sweeten life and to lead to wise employment of leisure. I am voicing, I am sure, the opinion of the Board in heartily commending the interest in school singing and the very excellent progress made by the children as shown by their acceptable performance before large audiences year after year. This work is not confined to any one section of the city. Practically all the schools take part and the prolonged and painstaking work that lies behind these public appearances demonstrates the interest and earnestness of both pupils and teachers. Only a limited number of the schools have ventured publicly into the field of dramatic art, but in the two or three instances in which the venture has been made, the result was more than creditable. There is a further obligation resting on the school of which the measure of fulfilment is not so easy to appraise. I mean the obligation for

spiritual culture, using this term with no theological significance but as including all the educational influences that lead to love of right and hatred of wrong. These influences operate mainly through the personality of the teacher and become a part of the atmosphere of the classroom determining the spirit in which the work is carried on. But many subjects lend themselves specially to this opportunity for ethical teaching. Wherever human relations and conduct are involved, as in biography, history, literature, the opportunity arises for discriminating between right and wrong in motive and conduct. Wherever there is work to be done, occasion is found for laying a foundation for character in habits of diligent, exact and faithful performance. The school cannot take too seriously nor stress too strongly this far-reaching purpose of education. Wisely planned and consistently carried out, it will include and promote in the most effective way all other aims.

The number of teachers at present in the employ of the Board in the day schools is 950. Of this total 710 are engaged in the Elementary Schools, 124 in the Intermediate Schools, and 116 in the High Schools. This represents an increase of 11 teachers over the total reported one year ago.

Four deaths among the teachers have to be recorded this year. Miss Bessie Meikle, a woman of the rarest gentleness and sweetness, with a genuine gift for teaching, who had served a term of 19 years in the elementary grades, died in February. Miss G. Ewen, a young Scottish teacher of great promise, who had served only one year, died during the summer vacation. Mr. J. P. Mellors, principal of the Victoria School, a man greatly respected and beloved by his pupils and his associates in the work, died suddenly towards the close of the summer vacation. Miss L. R. Chapman, formerly principal of the Albert School, who was placed on the retired list on account of ill health, died in May. Miss Chapman was recognized as an educational leader and one of the most competent teachers on the staff.

The withdrawal of Miss B. F. Stewart, who entered the service of the Board in 1889, calls for more than a

passing notice. She entered the service with an honorable record of successful work in high schools in Ontario and maintained that standard until her withdrawal on account of failing health at midsummer of this year. Large numbers of students in all walks of life hold her in honored memory for the unvarying interest she took in their welfare, and the example she set them of devotion to the duty of the hour.

In the report made last year by my predecessor in office, comment was made on the fact that large numbers of teachers were making use of their leisure time to improve their scholarship and professional training by taking courses offered in the evening schools, evening and Saturday classes conducted by the University and summer schools for teachers in Winnipeg and at other educational centres in Canada and the United States. During the past year the records show that more than 400 teachers or approximately one-half of the teaching force have been studying in these classes. This is yet another illustration of the fine spirit of service which prevails generally among the teachers.

While the enrolment in the evening schools shows no increase, the percentage of attendance indicates sustained interest on the part of the students. The student body in the elementary classes is made up mainly of two groups—boys and girls who left school before completing the public school course and are now supplementing their general education, and adults, foreign born, who evidently recognize that their fuller participation in the privileges of citizenship demands greater familiarity with English, spoken and written. The commercial department continues to draw a heavy enrolment from the ranks of young men and women who see in a mastery of stenography or bookkeeping prospect of vocational advancement. The household arts department is peculiarly attractive to those who find in it guidance in the practical problems of home-making. Two of the most popular courses in the evening school department are the matriculation and teachers'. In the matriculation classes an unusual number of young men and women are fitting themselves for professional careers. In the first class teachers' course, both non-professional and

professional, members of the Winnipeg teaching staff enjoy the opportunity of attaining more advanced standing in their profession. The most notable feature of the evening school classes at present is the permanence of the teaching staff. As the grading in these classes is less exact than in the day classes and the need for accurate appraisal of the ability of the individual student greater, experienced teachers are invaluable in maintaining a high standard of instruction.

While no building has been done during the current year, there has been sufficient accommodation to provide for the increase in enrolment of approximately 500 pupils. Through the foresight of previous Boards, provision had been made to meet the needs of the city during the period of rapid increase in school population. The completion in 1923 of the Collegiate Institute along with an addition to the Lord Roberts School, relieved the pressure on the elementary school accommodation in the districts served by these schools. There has thus been sufficient accommodation to provide for carrying on the work of the schools without retardation through overcrowding. It is not possible to speak with any certainty as to the need for the coming year until after the enrolment of new pupils for January 1925 has been completed. Consideration of this matter must, therefore, be left to the incoming Board.

In dealing with the topic of school buildings, reference should be made to the special attention being paid to the care of school buildings and grounds. To the caretaking staff, under the efficient direction of the Chief Operating Engineer, belongs largely the credit for the satisfactory condition in which both buildings and grounds are kept. A few years ago the Board appointed a special committee to take charge of the task of beautifying the school grounds. Mr. George Champion, Superintendent of the Parks Board, in a letter sent recently to the School Board, makes the following comment on the work accomplished by this Committee:

The work has been vigorously carried on each season, until practically every school ground has

received some embellishment in the shape of a strip of green lawn, some trees or shrubs, in some cases flower beds, and where no other means were possible, flower boxes have been used to give a touch of color and beauty. Playfields have been levelled and cleared of rough material likely to injure children in the event of a tumble. On three grounds a good turf has been established and in many cases coarse sand has been spread to insure a clean surface.

During the first years of the grounds improvement work, all the garden sections of the grounds were maintained by the School Board gardener and his men, but as more and more grounds were improved it was seen that the annual cost of maintenance under this plan would be very large, and a policy was adopted by the Committee of placing all the grounds, including the garden sections, under the care of the janitors, the gardener being responsible for all construction work and for the general supervision of the garden sections of the grounds.

The larger grounds with their extensive lawns, flower beds and plantings of shrubs are, of course, the most striking examples of the improvement work, but even the smallest attempts are appreciated as is shown in the increased interest and pride in the cleanliness and beauty of their grounds amongst the children.

Reference has already been made to the work of the Medical Inspection Department. A summary of the activities of this department and that of the allied department of Dental Inspection is given in the appended statistical tables. Further comment is unnecessary. During the year, with the co-operation of the Medical Inspection Department, the Provincial Board of Public Health undertook to make a survey of health conditions among the school children of Winnipeg. Nearly 600 children of varying ages, selected at random from various schools in different parts of the city, were examined by specialists assigned to this work by the Public Health Board. The report on the results of this survey has just been submitted for the information of the School Board.

It is unnecessary to comment further on the many and varied activities of the schools for the carrying on of which the Board is responsible, but the following summary will be of interest:

(a) In the Elementary and Intermediate Schools—

- (1) A general elementary course is given in eight grades leading to entrance to High School directly, or a course in six grades leading through the three grade course of the Intermediate Schools to Grade 10 of the High School.
- (2) Educational handwork in primary grades.
- (3) Manual Training for boys from grades 5 to 7.
- (4) Instruction in sewing for girls from grades 5 to 7, followed by a year's course in cooking in one of the up-to-date domestic science rooms.
- (5) Specially organized preparatory and opportunity classes for backward pupils.
- (6) Physical training and organized play.
- (7) A system of schools savings banks for the encouragement of thrift, having to the credit of the depositors at the end of November, 1924, the sum of \$144,262.28.
- (8) Text books are provided free of cost to all pupils up to and including grade 8.

(b) In the High Schools—

- (1) Courses leading to Matriculation in Arts, Engineering, Law, Medicine, etc.
- (2) Teachers' Course leading to the 1st Class Certificate.
- (3) Commercial Courses leading to business life.

- (4) Mechanical Arts courses for boys, in shops fully equipped for Electrical Work, Blacksmithing, Machine Shop Practice, Woodworking, Patternmaking, etc. These courses are also open to the boys of grade 8 in the elementary schools. 2,414 boys are receiving instruction in different shops for at least one-half day a week.
- (5) Courses for high school girls in Millinery, Garmentmaking, Cooking and its related science and general Home Economics.
- (6) Courses for both boys and girls in Art.
- (7) Physical training in well equipped gymnasiums, with organized athletic activities.
- (8) A text book department is operated by the School Board which sells books at cost to all students from grades 9 to 12 inclusive.

(c) **In the Evening Schools—**

Number of pupils enrolled 2,679

Number of teachers employed 93

- (1) Special courses in theory and practice of Electrical Engineering, Mechanical Engineering, Forging, Woodwork, Drawing and Applied Science.
- (2) Courses in Household Science and Practical Arts for Homemakers, professional dressmakers and milliners.
- (3) Commercial courses.
- (4) Courses in physical training in which full use is made of high school gymnasiums.
- (5) Courses leading to Matriculation in Arts, Engineering, Law, Medicine, etc., and to Teachers' certificates.
- (6) Courses leading to Civil Service.

- (7) Courses in elementary subjects to complete the general education of those forced to leave school before completing grade 8.
- (8) Classes for citizens of foreign birth who wish to perfect their knowledge of English.

(d) Services Auxiliary to work of all Day Schools—

- (1) The School Attendance Department now employing a Chief Attendance Officer and 5 assistants. This department exists, not only to promote regular attendance of pupils at school, but as an active agent in the work of Social Welfare.
- (2) The Department of Medical Inspection now employing one physician giving full time to the work, three giving half time, and fourteen nurses. During the school year ending June 30th, 1924, the nurses of this department conducted 152,086 examinations of pupils and made 14,271 visits to homes. In addition to this, 16,835 examinations were made by the Medical Inspectors in person. Since 1920 this department has also required the part time services of two oculists.
- (3) The Department of Dental Inspection now employing a Chief Dental Inspector giving full time, and 5 Assistant Dental Inspectors each giving half time. The total number of operations performed by this department during the year ending June 30th, 1924, was 24,214.

(e) Operation of the School Plant—

The Board is also responsible for the operation and maintenance of 67 school buildings, their equipment for the purposes of teaching, and the proper care of school playgrounds.

(f) The Staff—

To carry on the activities summarized above, it is necessary to employ the following staff:

*Teaching Staff—High Schools.....	116
Junior High Schools	124
Elementary Schools	710
	— 950
Supervisors	9
School Clerks	3
Medical Inspectors	4
Nurses and Clerks of Medical Insp. Dept.	16
Dental Inspectors	6
Clerks of Dental Inspection Dept.....	2
Oculists (part time only).....	2
Attendance Officers	6
Caretakers and Firemen, including Chief Operating Engineer	130
Repair, Maintenance and Utility Men.....	27
Administrative Staff, including Depart- ments of Superintendent, Secretary- Treasurer and Commissioner of School Buildings and Supplies and Chief Oper- ating Engineer, with all office assist- ants, clerks and stenographers.....	27
	<u>1,182</u>

*In addition to the above, 93 teachers are engaged in connection with the work of the Evening Classes from October to March.

The expense of providing and maintaining a modern school system for a large city is great. For the year just closing the expenditure for Winnipeg's schools exceeded \$3,000,000.00. The Board has kept steadily in mind the necessity of keeping school costs as low as possible consistent with efficient service. All school expenditures have been closely scrutinized by the members of the Board which is indicated by the fact that the annual per pupil cost which in 1921, based upon the average monthly enrolment, was \$82.55 per pupil had been reduced to \$77.01 per pupil in 1923, a reduction per pupil of \$5.54, or a total saving of approximately \$200,000.00. In 1921 the average monthly enrolment in the Winnipeg schools was 32,082 and in 1924 the number was 36,255, an increase since 1921 of 4,177 in the average monthly enrolment.

Turning to matters of finance, we find that from 1921 to 1924 there has been an increase of approximately \$350,000.00 in the expenditures for Fixed and Financial

Charges, and for Teachers' Salaries, which are controllable only to a limited degree. During the same period there has been a decrease on controllable expenditures, such as those covering supplies, operation of plant, repairs, auxiliary services, etc., of approximately \$190,000.00, this notwithstanding that during the period referred to there has been an increase in the average monthly enrolment of over 4,000 students. This clearly indicates that the Board has been exercising very close supervision over expenditures in which they have direct control. The books for the current year have not yet been closed, but from the detailed statements submitted each month to the Finance Committee it is quite certain that the Board has lived well within its estimated expenditures and that at the end of the year, there will be a substantial surplus. A detailed statement of all receipts and disbursements will be found in the audited financial statements submitted by the Secretary-Treasurer, which will appear in the Annual Report of the Board for 1924.

The Board from year to year has made Sinking Fund provision to retire its bonded indebtedness as it matures and by wise investment in Dominion, Provincial and Municipal Bonds this fund has been so increased that at the close of the current year it will amount to approximately \$1,780,000.00, giving a safe margin over the amount which under the respective by-laws authorizing the issue of school bonds, is required to be in hand on the 31st December, 1924.

The Teachers' Retirement Fund, through which provision is made for the payment of annuities to teachers who retire after at least thirty years of service and which is administered by a joint board of teachers and school trustees, shows distinct progress during the year just closing. After payment of annuities and other expenses of the year, there will be a surplus of over \$38,000.00 to transfer to the Reserve Fund and the Reserve Fund at the 31st December, 1924, will amount to a sum in excess of \$324,000.00. This Fund is largely invested in a grade of securities similar to the School Sinking Fund and on which no principal or interest payments are in arrears.

Respectfully submitted,
F. S. HARSTONE, Chairman.

Statistical Information

THE SCHOOL POPULATION CONTINUES TO GROW

The Winnipeg Public Schools are growing rapidly notwithstanding the conditions which have prevailed during and since the War period.

During the past eleven years the average monthly enrolment has increased from 19,166 in 1913 to 36,255 in 1924, an increase of 17,089 or 89.2%. This growth is phenomenal especially in view of the fact that during the same period the population of the City as a whole has increased by only 5.5%.

Continuous Growth of the Winnipeg Schools is
Indicated by the Following Table of
Comparative Statistics

Year	No. of Teachers and Specialists	No. of Buildings	Value of Buildings, Sites and Fixtures	Yearly Enrolment	Average Monthly Enrolment
1871	1	1	35	
1876	4	2	\$ 3,500	423

Enrolment and Attendance

The total number of pupils enrolled during the school year ending June 30th, 1924, was 40,627; 20,273 of whom were boys and 20,354 girls. Of this enrolment 32,761 had been on the register of the Winnipeg Schools in the previous year; 2,390 were received from schools in Manitoba other than Winnipeg Schools; 1,286 were received from schools outside of Manitoba and 4,200 had not previously attended school. This enrolment was distributed among the various grades as follows:

	Boys	Girls
Kindergarten	87	94
Grade I	3030	2736
“ II	2713	2697
“ III	2533	2631
“ IV	2689	2647
“ V	2508	2606
“ VI	1887	1913
“ VII	1519	1447
“ VIII	1277	1307
“ IX	875	996
“ X	684	717
“ XI	455	458
“ XII	16	111
Total	20273	20354

The enrolment by ages was as follows:

	Boys	Girls
3 years of age.....	4	8
4 “	35	43
5 “	77	55
6 “	1516	1503
7 “	1946	1955
8 “	2139	2165
9 “	2207	2211
10 “	2160	2123
11 “	2023	2121
12 “	2006	1913
13 “	1796	1824
14 “	1759	1704
15 “	1365	1290
16 “	762	824
17 “	305	383
18 “	90	130
19 “	19	31
20 years and over.....	64	71
Total	20273	20354

The attendance of pupils during the 197 days of the school year was as follows:

Less than 50 days.....	3277
50 to 99 days.....	2866
100 to 149 days.....	4182
150 to 174 days.....	6672
175 to 200 days.....	23630
	<hr/>
	40627
	<hr/>

The enrolment and attendance from month to month of the calendar year was as follows:

	No. of pupils on register	No. present during month	Daily average attendance
January, 1924....	38379	36137	32333
February	38624	36149	33426
March	38829	36008	33179
April	39962	36606	32441
May	40453	36376	33187
June	40627	35608	32699
September	36270	36270	33338
October	37099	36656	33027
November	37585	36551	33472
December	37787	36189	33412

The percentage of regularity of attendance in the various grades during the calendar year was as follows:

Grade I	88.0%
“ II	91.2%
“ III	92.3%
“ IV	92.7%
“ V	93.2%
“ VI	93.1%
“ VII	92.5%
“ VIII	93.2%
“ IX	93.0%
“ X	92.7%
“ XI	92.7%
“ XII	93.5%
Special classes	88.7%

Public Schools Savings Bank

The Schools Savings Bank operated for the encouragement of thrift among the school children has been conducted as in former years, there being at the end of the year 13,744 depositors having to their credit a sum of \$144,262.38. Corresponding figures for previous years are given in the following table:

Year	No. of Depositors	Total Amount on Deposit
1915	7,746	\$ 34,990.74
1918	10,844	68,361.40
1920	12,545	102,093.47
1921	14,836	132,475.39
1922	15,658	146,177.56
1923	14,666	139,921.38
1924	13,744	144,262.28

Teaching Staff

The teaching staff at the close of the calendar year numbers 950, classified as follows:

Elementary —General	676
Teachers of Manual Training and Home Economics.....	34
Total Elementary Teachers.....	— 710
Intermediate —General	117
Teachers of Mechanical and Household Arts	7
Total Intermediate Teachers.....	— 124
High School —General	91
Teachers of Mechanical and Household Arts	25
Total High School Teachers.....	— 116
Grand Total	950

STATISTICAL REPORT OF MEDICAL INSPECTION DEPARTMENT

January to December, 1924

Physical Examinations made by Medical Inspectors 16741

New pupils examined.....	5301
Pupils previously normal, re-examined.....	4562
Pupils previously defective, re-examined....	4556
High school pupils examined.....	2245
Special examinations for Psychologist.....	77

Intelligence Tests given..... 41

Report on Contagion—

Total cases affecting schools.....	2675
Children in school.....	1721
Children in homes, not school children	954

Nurses' Report—

Visits to schools.....	5497
Visits to homes.....	13886
Examinations—Routine	128160
For Medical Inspectors....	13195
Unreported cases of contagion discovered by nurses	945
Swabs taken	3062
Swabs positive	193
First aid dressings.....	1359
Little Nurses' League Lectures.....	176
Assisted Health Office with Vaccination....	1525
Assisted Health Office with Schick Tests..	1632
Family Histories for Psychologist.....	33

Psychologist's Report—

Individual testing	538
Group testing	126

Oculists' Report—

No. of clinics held.....	247
No. of examinations made.....	880
New examinations	692
Re-examined	188
Refractions completed	541
Not needing refraction.....	80
Returned for observation.....	42
Not refracted because drops not used.....	29
	<hr/>
	692

Completed refractions—

Not needing glasses.....	118
Glasses prescribed for.....	423

541

Prescriptions given for—

External diseases of eye.....	41
Hyperopia	102
Myopia	66
Simple Astigmatism	3
Mixed Astigmatism	35
Hyperopic Astigmatism	25
Compound Hyperopic Astigmatism.....	170
Compound Myopic Astigmatism.....	21

463

Cases $\frac{1}{3}$ or less of normal vision with
glasses

4

I deplore paternalistic tendencies which substitute dependence upon the state for self-dependence and self-reliance of the citizen but it is one of the highest functions of the state to safeguard children and to protect the public health, and the proper discharge of that function is not paternalistic. * * * No child in the state should be handicapped by a remediable physical defect.—
Gov. Miller, of N. Y.

STATISTICAL REPORT OF DENTAL INSPECTION DEPARTMENT

January to December, 1924

	Jan.	Feb.	Mar.	Apr.	May	June	Sept.	Oct.	Nov.	Dec.	Tls.
No. of children examined	321	289	256	138	249	261	1275	6730	1630	899	12048

CHAIRMEN OF WINNIPEG SCHOOL BOARD

From 1871 (Date of Organization of Board) to 1924

*1871-1872	A. Wright
*1873-1874	R. A. Davis
*1875	Thomas Lusted
*1876	Col. J. Kennedy
*1877	J. H. Hargrave
*1878	Duncan Sinclair
*1879-1880	A. J. Belch
*1881-1884	Stewart Mulvey
*1885-1887	W. F. Luxton
*1888-1892	P. C. McIntyre
*1893-1895	E. Benson, M.D.
*1896-1897	James Stuart
*1898	Joseph Carman
1899-1901	D. W. Bole
*1902	J. F. Fowler
1903-1904	D. A. Ross
*1905-1906	Angus Browne
1907-1908	J. A. McKerchar
1909-1910	Geo. A. Lister
†1911	Arthur Congdon
*1911	John McKechnie
1912-1913	T. G. Hamilton, M.D.
1914-1915	J. T. Haig, B.A.
1916-1917	R. R. Knox
1918-1919	R. W. Craig, K.C.
1920-1921	W. J. Bulman
1922-1923	Arthur Congdon
1924	F. S. Harstone

*Deceased

†Resigned March, 1911

INSPECTORS AND SUPERINTENDENTS

1876	Rev. Geo. Bryce, M.A., LL.B.
1878	Rev. J. F. Germain, M.A.
*1880	S. C. Biggs
*1882	J. H. Stewart
*1882	J. B. Somerset
*1883	John Fawcett, M.A.
1885-1924	Daniel McIntyre, M.A., LL.D.

*Deceased
